Low Energy & Passive Building Products

## WHY MAKE A BUILDING AIR-TIGHT?

With more emphasis on energy efficiency in buildings in the current climate, air-tightness of buildings plays an important part of the energy mix, reducing or eliminating the heat lost through air leakage.

These leaks usually occur in the building fabric at junctions and penetrations of the fabric. The Partel range of products provide a solution to all these problem areas with various tapes and membranes of the highest quality and ease of application.

**Contact us for expert advice and to discuss our products and materials most suitable for your project!**

### Products include :

- Airtightness Tapes and Membranes
- Paint on Airtightness Membranes
- AlmaTherm Structural Insulation for Door Thresholds
- Air Tight Attic Hatches

**Build Right,  
Build  
Air-Tight!!**
